Company Profile

Beijing Huanu Chain Co., Ltd (originally Hangzhou Huaxiang Chain Co., Ltd.) was founded in 1988. Its core product spans its precision roller chains and agricultural chains. Conveyor chains, bush chains and all kinds of non standard conveyor chains are also in its scope of supply. Our company has concentrated on our brand building —“EP”—the icon of trademark ELEPHANT over past 20 years, and got the acceptance and praise by the domestic and foreign customers.

From the very beginning of our set-up, we cast away the practice of blind expansion, excessive pursuit of quantity and massive competition with our rivals. Instead, we canalized our efforts into scientific management, technological innovation, quality progress and founding a long-standing company. Now our company has been officially recognized as a qualified supplier by well-known international enterprises from Europe, Japan and U.S.A. after their evaluation of our management, credit and delivery.

We give first priority to human-centered and environment-friendly orientation during the course of planning and implementing technological innovation and upgrading of facility. All efforts taken by us are involved in maximizing the reduction of labor intensity and mitigating environmental pollution. Automatic polishing machines with low noise circulating water system, several high-speed punching machines with progressive continuous blanking die and new pattern large-capacity shot blasting machines etc. are put into use constantly. These machines, together with the bush making machine and pin cutting machine newly imported from Japan, not only greatly improved efficiency of the sound field and quality of our products, but also reduced noise and dust pollution, which opened a door to manufacturing in enlarged scale and civilized ways.

Talents is the core of our company who vanguard our development. We are now setting up a research team and forge ahead in the progress of developing automatic chain-making facilities and chain products that can meet the demand of international market.

“HUAYU” today is full of confidence and energy. Our slogan is: making friends and rendering service throughout the world.
